Repeater report

Ed, KØVU, and Art, WAØNJR, have been working on the .015 and it's much improved. Including UHF link, shorter squelch tails, and muffled audio. Still looking for a tube final amp for full power out.

The 94/34 was down for a while. It's back on the air now and will soon include a tone board set at 85.4.

Feb hamfest will be the 16th.

Our e-mail reflector has not been working out. Brad has volunteered to set up a Yahoo! group for us. This will make e-mail communication fast and reliable. If you're on Yahoo! look for "scarcmn." Next meeting we'll show everyone how to sign up.

The WØSV website has want ads and they're updated as needed. You should take a look before it's all gone.

Larry, KCØSMM won the World Radio subscription and John, KCØSMJ, was drawn for the \$5 door prize - but wasn't present to win.
