ARROWHEAD INCIDENT COMMAND VEHICLE SHOWCASED AT KANABEC COUNTY FAIR

The Arrowhead Region Incident Command Vehicle on display at the Kanabec County Fair. [KDØCI photo]

Kanabec County and surrounding area residents had an opportunity to tour the Department of Homeland Security's Arrowhead Region Incident Command Vehicle, which was on public display for the first time at the Kanabec County Fair. The three day fair opened in Mora on Thursday July 23rd. The ARICV was on display during the first two days of the fair, after which it was scheduled to participate in the Mora parade on Saturday July 25th.

Kanabec County Emergency Management Director Lowell Sedlacek, KDØFLQ, arranged for the vehicle to be put on display at the fair in order to provide an opportunity for the general public to learn about steps being taken to facilitate communications in the event of a regional emergency. He then asked for volunteers, mainly members of the Mora Open Repeater Association and employees of Kanabec County Emergency Management, to be on hand to provide the tour, and to answer questions about the vehicle. See "ARICV Showcased"....continued on Page 2

All this and more in this issue of the KDØCI Radio Newsletter!

KCØYLF and KDØCI at the Amateur Radio desk inside the Incident Command Vehicle. [KAØAJF photo]

ARICV Showcased - continued from Page 1. Recently, the vehicle was involved in an emergency exercise at the very end of the Gunflint Trail along the Canadian border in extreme northern Minnesota, an area known to be one in which communications into or out of is extremely difficult. Yet the vehicle's equipment proved very capable of overcoming communications obstacles, performing above anyone's expectations.

The vehicle itself is a motor home that was gutted, then refurbished to serve as a mobile command post for situations ranging from search and rescue, to natural disasters such as tornados or floods, to pandemic outbreaks, to terrorist attack. It is equipped with a wide range of communications gear including Amateur Radio, and could be called upon in any emergency that happens within the Arrowhead Region of Minnesota.

A Kenwood TM-D700 VHF/UHF transceiver is a permanent part of the vehicle's communications capability, but there are provisions for HF capability as well.

The ICV Project, conceived in a cooperative effort by Pine and Kanabec Counties and the Mille Lacs Band of Ojibwe, has been three years in the making and although not completely finished, showcasing the vehicle at the fair was an opportunity to show that steps are being taken by authorities to ensure that communications will be maintained during emergencies.

NEWS FROM OUR REGION AND ELSEWHERE

Skywarn Activity in Mille Lacs and Kanabec County Surprisingly Strong

After several weeks of drought in Eastern Minnesota, along with several false threats of severe weather outbreaks, the weather broke with vengeance on Tuesday July 14th. Severe storms moved across the region during the late afternoon and evening, activating Kanabec and Mille Lacs County Skywarn Spotters as a group for the first time.

The Skywarn Spotter response was surprising, particularly in Kanabec County where as recently as a year ago there was no repeater, and few Skywarn Spotters. The Ogilvie Repeater Skywarn Net was activated shortly after 6 PM, and remained activated until shortly before 9 PM.

The Skywarn Net on the Ogilvie repeater drew ten spotters in Kanabec County alone. Mille Lacs County also had spotters out, one of whom liasoned with Skywarn Net Control on the Ogilvie repeater. Hail was reported in several locations, mainly in southeastern Mille Lacs and southern Kanabec Counties.

Skywarn Spotter activity is still lacking in northern portions of both counties, and was painfully evident that evening as the National Weather Service was looking for reports of possible hail and wind damage in those areas based on their radar observations.

Activation of the Skywarn Spotters Net on the Ogilvie repeater also resulted in the first ever canceling of the regularly scheduled session of the Tuesday Evening EMESNET on 146.565 MHz.

Dakota Division ARRL Director Appeals for Amateur Support of HR-2160

ARRL Dakota Division Director Jay Bellows, KØQB, appealed to Radio Amateurs in the division to support a bill in the US House of Representatives which is intended to help address amateur radio antenna installation restrictions. He referenced an editorial by Dave Sumner, K1ZZ, in the July issue of QST, which provided some background regarding antenna restrictions, the help provided by PRB-1, and continuing problems – particularly those involving restrictive covenants. Trailer courts and apartment buildings are among the most likely to impose such covenants.

“Whether or not you are now affected by restrictive covenants” Bellows said in a July 1st email memo quoting Sumner, “the ARRL needs all members to get behind this legislation. More information is in ‘Happenings’ this month (page 66 [QST]) and on the Government Relations page on the ARRL Web site. If you are logged into the ‘Members Only’ section of the ARRL Web site, www.arrl.org/members-only/ shows the name and address of your member of Congress and provides a link to a sample letter of support for HR 2160. Please write your Representative (there is no bill on the Senate side yet) and ask that they sign on as a co-sponsor. If you are a constituent of the sponsor or one of the co-sponsors, please drop him or her a note of thanks for their early support.”

In our region of coverage, Michelle Bachmann [R] represents Minnesota’s Sixth Congressional District, while James Oberstar [DFL] represents Minnesota’s Eighth Congressional District. In Wisconsin, David Obey [D] represents the Seventh Congressional District.

There was no late word regarding the bill as this issue of the Newsletter went to print.

Changes in “The Newsletter”

The KDØCI Radio Newsletter is a “work in progress” and over the past couple of months, you might have noticed a few subtle changes. Here are some of the changes made for now.

Starting with this issue, a “WANTED” section was added to the Flea Market ads. If you are looking for something in particular, you may list that item in the “WANTED” section. As with all our ads, the listings are published for free. We are also changing the name of the ads listings from “Flea Market” to “THE KDØCI NEWSLETTER MARKETPLACE”.

Changes already implemented include a quarterly only listing of Regional Repeaters and Nets. Monthly listings tend to be too redundant, and they often crowd out more relevant information. Changes in repeaters or nets will be individually noted in the newsletter lieu of listing changes. Regional Repeaters and Nets will typically be listed in the first month of each new quarter.

Like Working Rare DX!

In Amateur Radio, working DX is a passion for many. Working rare DX is even more of a passion. However, the story you are about to read makes rare DX contacts pale in comparison.

On a recent Sunday morning, Lyle Koehler, KØLR, hit a very rare two meter repeater double by making contact with two [count 'em, TWO] repeater custodians – back to back no less!

As he was driving south through the quiet countryside near Mille Lacs Lake, he established contact with Bob Mackey, WBØSYO, the custodian of the Isle repeater. Following that remarkable achievement, and upon driving further south towards Ogilvie, he actually made contact with Kenny Broshofske, KDØCI, custodian of the Ogilvie repeater!

Imagine the shock and amazement he must have experienced, making two consecutive contacts like that on the same morning! Seems that should be worth some sort of Rare Contact Award!

THIS MONTH IN REGIONAL RADIO HISTORY

One Year Ago – The Mora Open Repeater Association takes the next step in resurrecting itself by electing officers. Past club president Charles Turner, KAØEVR, is nominated and elected president at the July club meeting.

Also one year ago, a meeting was held at the Milaca Public Health Center to discuss reopening the facility to area Amateurs to allow them to participate in the Tuesday Evening Net. Reopening the facility would thus fill a twofold purpose – one, to provide operators who have no equipment an "on air" training opportunity and two, to ensure the facility's radio equipment remains in operating condition and capable of simplex operations. The facility was since reopened for use on the fourth Tuesday of the month during the "Emergency Services" sessions of the Tuesday evening Eastern Minnesota Emergency Simplex Net.

The Milaca Public Health Center had been opened for such operations during the first few months of the net, but then was suddenly closed. KDØCI had lobbied since then to get the facility reopened, and finally happened in September.

KDØCI RADIO NEWSLETTER REGIONAL COVERAGE AREA

The following counties in Eastern Minnesota and Northwestern Wisconsin are considered to be within the regional coverage area of the KDØCI Radio Newsletter.

In Minnesota: Coverage area includes all or portions of the following eighteen counties:

Aitkin [Southern Half], Anoka, Benton, Carlton, Chisago, Crow Wing [Southeast Quarter including the city of Brainerd], Hennepin [North and Northwest Suburban], Isanti, Kanabec, Mille Lacs, Morrison [Eastern Half including the city of Little Falls], Pine, Ramsey [North Suburban], Sherburne, St Louis [City of Duluth and Suburbs], Stearns [City of St Cloud and Suburbs], Washington, and Wright.

In Wisconsin: Coverage area includes all or portions of the following four counties:

Burnette, Douglas [Southwestern Half including the city of Superior], Polk, and St Croix [Northwestern Quarter].

The intent of this newsletter is to provide balanced coverage as much as possible in order to keep interested parties throughout the region informed. Much of that coverage depends on input from individuals and clubs throughout the region. Since it began in 2006, the newsletter has grown to where it currently enjoys a wide distribution to individuals and other interested groups in an area ranging from within this region to as far away as the Philippine Islands!

ABOUT THIS NEWSLETTER

The **KDØCI Radio Newsletter** is a free, independent Amateur Radio information publication for Eastern Minnesota and Northwestern Wisconsin, and is distributed monthly [or more frequently if required] by email to amateur radio operators and clubs, public service officials, and other interested parties. Permission is granted to subscribers to reprint this newsletter for distribution to others. Material herein may be used as long as this newsletter is referenced as the source, or sources within the newsletter are credited.

Your comments, questions, etc for this newsletter are always welcome. Send your comments, as well as any “newsworthy” or “for sale” items for inclusion to either of my email addresses. **Deadline for submitting material for the Newsletter - including ads, is the 20th of the month** [submittals subject to editing]. Primary Email Address: kd0ci@arrl.net [proxy server for kdzeroci@q.com] Alternate: kd0ci@yahoo.com
